Professional Summary

Full-Stack Developer with hands-on experience in **Next.js (frontend & backend)** development, feature implementation, authentication systems, and advanced debugging. Proficient in **Docker-based containerization**, including MongoDB setup and docker-compose configuration for scalable and consistent deployments. Strong logical thinker with solid problem-solving abilities and experience collaborating within fast-paced development teams.

Professional Experience

Full stack Web Developer <i>ThreatCure</i> 🔗	01/01/2026 – 01/03/2026 Karachi, Pakistan
- Improved performance and scalability of Next.js full-stack applications by debugging, optimizing API integrations, and refactoring backend modules in an Agile development environment. - Built secure authentication and authorization systems using JWT, bcrypt, and role-based access control to enhance backend security and user data protection. - Collaborated closely with cross-functional development teams to improve application performance, system reliability, and maintainable code architecture through structured problem-solving and clean coding practices. - Leveraged Docker and docker-compose to build and manage containerized environments, migrated local MongoDB databases into containers, and ensured consistent, portable, and scalable deployments across development and testing stages.	

Education

Bachelor's in computer science 3.12 GPA <i>University Of Karachi</i> 🔗	01/2021 – 12/2025 Karachi, Pakistan
--	---------------------------------------

Relevant Coursework

• Operating System	• Internet Application Development	• Theory of Computer Science
• Artificial Intelligence	• Object Oriented Programming	• Relational DataBase Managment
• Operation Research	• Data Structures and Algorithms	• Modeling and Simulation
• Numerical Analysis	• Data Warehouse and Data Mining	• Network Security and Cryptography

Programming Languages

• JavaScript	• Java	• Python	• C++
--------------	--------	----------	-------

Technical Skills

• ReactJs	• NodeJs	• ExpressJs	• NextJs
• JavaScript	• TypeScript	• MongoDB	• SQL
• TailwindCss	• DBMS	• Docker	• Authentication
• Git	• GitHub	• Prisma	• Mongoose
• RESTful API	• Backend Development	• Scalable Applications	• Postman
• Deployment(Vercel)			

Personal Projects

Portfolio Website 🔗 - Developed a modern, fully responsive portfolio website using Next.js 15, React 19, and TypeScript with Tailwind CSS for optimal performance and user experience across all devices. - Implemented smooth scroll-reveal animations, interactive UI elements, and dynamic project showcases with live demo and GitHub integration for enhanced visual appeal. - Integrated Brevo API for contact form email service with built-in rate limiting (3 emails/hour per IP) and server-side validation to prevent spam and ensure secure communication. - Optimized SEO with structured meta tags, custom font optimization (Playfair Display & DM Sans), and deployed on Vercel with analytics integration for better search visibility and performance tracking. - Deployed applications on Vercel
Fable e-commerce-website 🔗 - Developed a full-stack e-commerce platform with JWT cookie authentication, role-based access, and OTP email password reset via Brevo. - Developed scalable RESTful APIs using Node.js, Express.js, and MongoDB, enabling efficient backend data handling for authentication, cart, and order management systems. - Built core shopping features including product filtering, cart management, wishlist, and order tracking with real-time status updates. - Created a full admin dashboard to manage products, orders, and customers with search and pagination. - Designed a responsive, mobile-friendly UI using React, TypeScript, and Tailwind CSS with a clean component architecture. - Tested APIs using Postman. - Deployed applications on Vercel.
MERN Authentication System 🔗 - Developed a full-stack authentication system using the MERN stack (MongoDB, Express.js, React.js, Node.js), ensuring secure and efficient user management. - Enforced secure login functionality with JWT token generation and password encryption using bcrypt for enhanced security.

- Added automated email functionality for welcome messages and password reset links using NodeMailer to improve user experience.
- Integrated cookie-parser and CORS configurations to enable secure and reliable backend communication between client and server.
- Tested APIs using Postman

Weather Web App [🔗](#)

- Created a React.js weather application that retrieves real-time weather data using the OpenWeatherMap API, demonstrating API integration skills.
- applied dynamic weather updates with temperature, conditions, and location-based details for accurate, up-to-date information.
- Designed a clean, responsive UI to ensure seamless usability across both desktop and mobile devices.
- Deployed applications on Vercel.

Obsidian Restaurant [🔗](#)

- Implemented scroll-reveal animations and interactive UI with Framer Motion, including menu category filtering, a masonry gallery, testimonials carousel, and a multi-field reservation form.
- Built a reservation API with server-side validation (email format, future-date checks, required fields) and a reference number system, structured for easy database and email integration.
- Optimized SEO with Open Graph meta tags, custom font optimization (Cormorant Garamond & Jost), and a clean component architecture.
- Tested APIs using Postman
- Deployed applications on Vercel

404-Squad Website [🔗](#)

- Developed a fully responsive static website using HTML, CSS, and JavaScript during an in-class competition, demonstrating strong front-end development skills.
- Applied a mobile-first design approach to ensure optimal viewing and smooth navigation across all screen sizes and devices.
- Deployed applications on GitHub Actions

Certificates

- Foundations of Web Development: CSS, Bootstrap, JS, React [🔗](#)
- Front-End Web Development using JavaScript and React.js MLSSA BootCamp [🔗](#)
- Front-End Web Development using JavaScript and React.js GDC BootCamp [🔗](#)
